

configuration and builds

testing

SwProductivityAndSustainabilityForCseAndDataScience.SIAM-CSE17.md

```
graph LR; A[configuration and builds] -- cyan arrow --> C[SwProductivityAndSustainabilityForCseAndDataScience.SIAM-CSE17.md]; B[testing] -- orange arrow --> C;
```

The diagram illustrates a workflow or dependency structure. On the left, there are two boxes: a cyan box labeled 'configuration and builds' and a gray box labeled 'testing'. Arrows from both boxes point towards a central, larger gray box on the right. The cyan arrow originates from the right side of the 'configuration and builds' box, and the orange arrow originates from the right side of the 'testing' box. Both arrows converge towards the left side of the central box. The central box contains the text 'SwProductivityAndSustainabilityForCseAndDataScience.SIAM-CSE17.md'.
